

# Certification of digestate as biofertiliser

**Steering Group meeting; 8 June 2022**

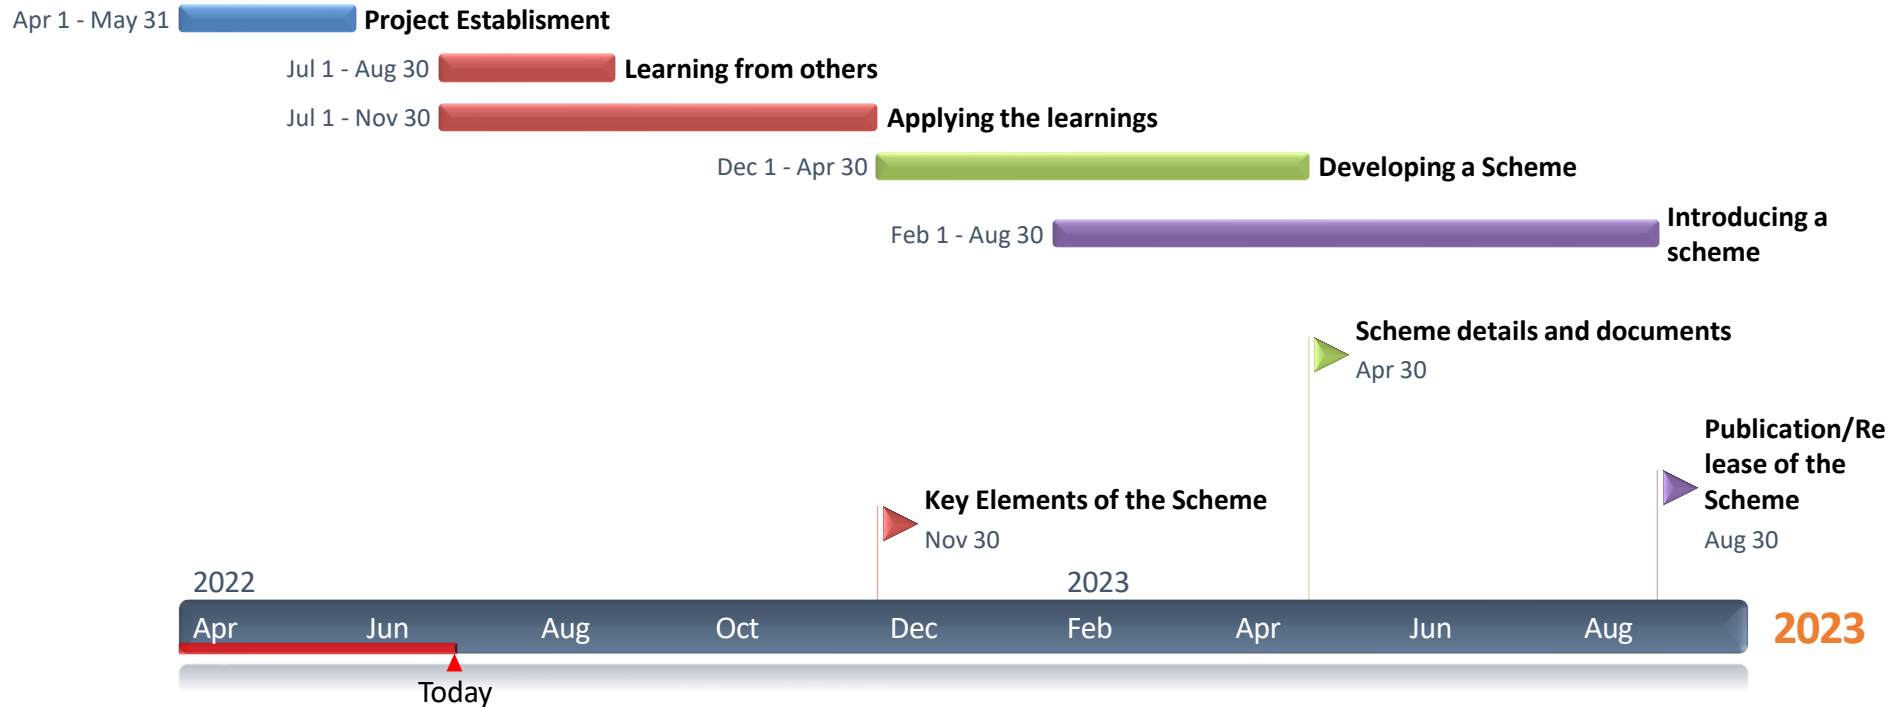

# Purpose

- Key features of the scheme
  - **acceptable and credible** for all stakeholders,
  - **practical** for users
  - **affordable** compared to synthetic fertilizer
- It **decouples** certified AD facilities from waste regulatory framework
- **Protects** human, animal, plant health and environment
- Establishes a **value** for digestate

# Programme

1. Fertiliser classification
  - a) Learning from others (and our-selves)
  - b) Applying the learnings
2. Developing Certification Scheme
3. Introducing the scheme
  - a) Defining key interactions with environment, society and end-users
  - b) Socialisation
