- **Characteristics:** JGC 320 GS-N.L, 1,063kWe electrical output.
- This option is from Jenbacher's Type 3 engine family, which was introduced in 1988 and has in excess of 6,500 units installed worldwide. The Type 3 is compact enough to be accommodated within a standard width ISO container and operates on a wide variety of gaseous fuels including digester biogas, landfill gas, well head, and natural gas. Electrical efficiency is mid-range at 40.0% for this particular engine model.
