Biogas in European countries

For a snapshot of how some European Countries are investigating and maximising the potential of biogas use in transport see the following links:

**Europe / European Commission**
- **BIOGAS MAX - A DRIVING FORCE** - The European Biogas max project creates a network of biogas-related demonstrations on the European territory with the aim of sharing experiences in terms of best practices in managing urban transportation.
- **Biogas in Captive Fleets - A NICHES Consortium Publication**

**United Kingdom**
- **Biogas as a Road Transport Fuel – an assessment of the potential role of biogas as a renewable transport fuel** - Research undertaken for the UK's National Society for Clean Air and Environmental Protection.
- **National Farmers Union - Information on biogas potential**

**Sweden**
Since the 1990s, an increasing number of Swedish cars run on biogas, natural gas or a mixture of the two. 1 m³ of biogas is equivalent to approximately 1.1 litres of gasoline and in Sweden was in 2007 sold more than 28 mio. m³ of biogas for transportation.
- **Sweden tests first biogas train (2005)**
- **Biogas as a Transportation Fuel - FVS Fachtagung 2003 (Swedish Gas Centre)**
- **Biogas upgrading and use as transport fuel 2004 (Swedish Gas Centre)**
